### 3 Name

my\_camera

### 4 Access from anywhere

#### All-in-one solution

With Yoics your product can be instantly Internet ready. Featuring our patent-pending auto-configuration technology, your product will be instantly detected and configured on-line, and immediately accessible and sharable. Your support costs will be reduced as Yoics eliminates complex router configurations, port-forwarding, and the worry about dynamic IP addresses changing.

Your support team will also love the ability to get right to the products configuration menu to easily trouble shoot any issues that customers might be having.

Yoics embedded software can be added to almost any network enabled product to allow it to truly Internet ready.

#### INSTANT NETWORKING

Just add the Yoics embedded software to your network enabled device and Yoics auto-configuration technology takes over. Instantly configure and access your product from any browser anywhere. Yoics embedded software takes care of registration, configuration and secure access to your product. Your support costs are almost eliminated!

#### EASY TO EMBED

Yoics embedded software is small, running in as little as 50KB of memory. It is easy to integrate also; as it is ported to many RTOS, embedded Linux and BSD based systems. In many cases you can have your product remote accessible, auto-detectable, and auto-configurable in a few hours.

#### REGISTRATION & SUPPORT

As a value added service to our manufacturing and system OEM partners, Yoics offers instant registration and support services. As part of the auto-registration process, user information is instantly integrated into your customer database. Through Yoics universal remote access, your support team will be able to access and trouble shoot your customers products instantly, with 'eyes' on the products real interface; the ultimate in trouble shooting assistance.

#### UNIVERSAL WEB ACCESS

Yoics can also provide custom UI interface assistance so your products are ready-to-run in all popular browsers & with the Yoics.net service can be viewed from any connected browser anywhere, even mobile ones.

#### ELIMINATING COMPLEX NETWORK CONFIGURATION & PROVIDING UNIVERSAL ACCESS

surveillance | network attached storage | home AV | ip cameras | web cameras | smart handsets
